LIMITED WARRANTY OF USER-REGISTERED SOFTWARE PRODUCTS MANUFACTURED OR DISTRIBUTED BY THE SOFTWARE GUILD, INC.

THIS WARRANTY IS NOT EFFECTIVE UNLESS THE WARRANTY CARD IS RETURNED TO THE SOFTWARE GUILD, INC., WITHIN FIFTEEN (15) DAYS OF PURCHASE. SOME STATES MAY NOW ALLOW THIS LIMITATION, SO THIS CONDITION MAY NOT APPLY TO YOU.

The Software Guild, Inc., (Guild) guarantees the accompanying software product to be free from defects in materials and workmanship, for a period of thirty (30) days from date of purchase. "Software Product" shall be defined to include the documentation and media (i.e., magnetic disk, cassette, etc.), BUT NOT THE PROGRAM CODE.

DISCLAIMER OF WARRANTY AND LIABILITY FOR THE COMPUTER PROGRAM

The Softsmith Corporation is dedicated to offering its customers the widest variety of high-quality software products available. To do this, Softsmith recruits programs from across the nation.

Softsmith is required by law to notify you that, this Softsmith program is sold "AS IS", and we do not guarantee it in any way. In particular, we make no warranty, express or implied, including warranties of merchantability and fitness for a particular purpose. To the extent allowable under law, we do not assume responsibility for any losses or damages of any kind that might result from the use of the program portion, of a Softsmith Product. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

We hope this program meets your requirements, but we ask you to read the documentation completely, before using it, in order to protect your program and data.

OVERVIEW

Let us introduce you to Micro Barmate—the computer-age bar guide for parties and entertainment. The program comes complete with drink recipes ranging from how to make a martini drier than the Sahara Desert to the delicious surprise of a Pink Lady! Whether you're making cocktails for two or two hundred, Micro Barmate is the advisor you can always count on. Further, Micro Barmate never says "no": it's always in the mood for a party, and always ready to discuss its favorite topic—alcohol!

Modifying an Existing Recipe

The same three screens used to enter the drink recipe are used to modify it. The three modification screens will contain the data previously entered in the input areas. You can change all or part of the drink data.

To modify an existing drink recipe simply:

1. Press [2] followed by [RETURN] from the Enter/Modify/Remove sub-menu. A screen will appear requesting the name of the drink you wish to modify.
2. Type the name of the drink in the input area provided, followed by [CTRL-C] or [RETURN].
3. The familiar first screen will appear. Notice that the drink name cannot be changed. Move to the next input area, classification, using either [→] or [RETURN]. Modify the drink classifications, ingredients, quantities, and measurements as you wish. Use [→] and [←] to maneuver about the screen.
4. Once you've finished modifying the first screen, press [CTRL-C] and repeat the same process for the glass selection and directions screens. Once you've modified the final screen, press [CTRL-C] and Micro Barmate will modify the recipe on your Recipe diskette.

Removing an Unwanted Recipe

Micro Barmate allows you to remove unwanted drink recipes from the drink recipe diskette. The removal is permanent, and should be used with great care.

To remove an unwanted drink recipe:

1. Press [3] followed by [RETURN] from the Enter/Modify/Remove sub-menu. A screen will appear requesting the drink name to remove.
2. Type in the name of the drink recipe in the data input area followed by [CTRL-C] or [RETURN] to remove the drink recipe.

IV. Altering Defaults and Printing

This chapter explains two optional Micro Barmate features. The first is the Sort Option, which presents the indexes in alphabetical order. The second is the Extensible Search Option which provides a more comprehensive search on indexes. These features are called "defaults" because, by default, they are turned off. This chapter tells you how to turn them on if you desire to do so. Then, this chapter explains two printer defaults which you cannot ignore if you plan to print a recipe or index. These involve the location of your printer card, and the designation of control characters or numbers which tell Micro Barmate what kind of printer you have. The program defaults to slot #1 and a specific set of numbers, and these defaults must be changed if your card is in a different slot, or the numbers do not match with those designated for your printer. After you make Micro Barmate compatible with your printer slot and control characters, you'll see how to print indexes and recipes.

TURNING ON THE SORT OPTION

Micro Barmate stores drink names, ingredients and classifications in random order. However, by turning on the Sort Option, your indexes will be sorted in alphabetic order. (The first two characters of each drink name are treated as significant.)

After pressing [4] and [RETURN] from the Enter/Modify/Remove sub-menu your cursor will be positioned after the line

SORT (1 = ON):

If you prefer your indexes to be presented in alphabetical order, replace the [0] following that line with a [1]. Press [CTRL-C] to save your alteration. [ESC] returns you to the previous menu.

TURNING ON THE EXTENSIBLE SEARCH OPTION

Micro Barmate also contains an Extensible Search Option (ESO). If the Extensible Search Option is turned on, Micro Barmate will perform a more sophisticated search on ingredients. First, if the ingredient is specified in a plural context (i.e., "lemons"), and the ingredient does not exist, a search for the singular form ("lemon") will occur. Naturally, the inverse action occurs if originally specified in
